

| HL7 v2.5 ORU^R01^ORU_R01 Message: Incorporation of Laboratory Results | | |
|---|--------------------------|--------------------------|
| Test Case ID | LRI_3.0_1.1-GU | |
| Juror ID | | |
| Juror Name | | |
| HIT System Tested | | |
| Inspection Date/Time | | |
| Inspection Settlement (Pass/Fail) | Pass | Fail |
| | <input type="checkbox"/> | <input type="checkbox"/> |
| Reason Failed | | |
| Juror Comments | | |

This Test Case-specific Juror Document provides a checklist for the Tester to use during testing for assessing the Health IT Module's ability to display and incorporate required data elements from the information received in the LRI message. Additional data from the message or from the Health IT Module are permitted to be displayed and incorporated by the Module. Grayed-out fields in the Juror Document indicate where no data for that data element were included in the LRI message for the given Test Case.

The format of the Display Verification section of this Juror Document is for ease-of-use by the Tester and does not indicate how the Health IT Module display must be designed.

Display Verification

Legend for Display Requirement

Data in **bold red** text: HIT Module must display exact version of stored data

Data in ***bold black italics*** text: HIT Module must display exact version of data received in the LRI message

Data in regular text: HIT Module may display equivalent version of stored data

| Patient Information - Display Verification | | | | | |
|--|------------------------|------------|-----|--------------|----------------|
| Patient Identifier | Patient Name | DOB | Sex | Race | Tester Comment |
| <i>PATID1234</i> | <i>William A Jones</i> | 06/15/1961 | M | White | |
| When a given patient has more than one Patient ID Number, the HIT module may display the ID Number that is most appropriate for the context (e.g., inpatient ID Number versus ambulatory ID Number.) | | | | | |

| Lab Results - Display Verification | | | | | | | | | |
|---|-------------------------------------|--------------------------|---|---------------|--------|--------------------------|------------------------------|-----------------------|----------------|
| Test Performed: | Lipid 1996 panel in Serum or Plasma | | | | | | | | |
| Test Report Date: | 09/26/2015 14:05:51 | | | | | | | | |
| Result Report Status | F | | | | | | | | |
| Result Observation Name | Result Value | UOM | Reference Range | Abnormal Flag | Status | Date/Time of Observation | End Date/Time of Observation | Date/Time of Analysis | Tester Comment |
| Cholesterol [Mass/volume] in Serum or Plasma | 196 | milligrams per deciliter | Recommended: <200; Moderate Risk: 200-239 ; High Risk: >240 | N | F | 09/25/2015 :: | | 09/26/2015 14:00: | |
| Triglyceride [Mass/volume] in Serum or Plasma | 100 | milligrams per deciliter | 40 to 160 | N | F | 09/25/2015 :: | | 09/26/2015 14:00: | |
| Cholesterol in HDL [Mass/volume] in Serum or Plasma | 60 | milligrams per deciliter | 29 to 72 | N | F | 09/25/2015 :: | | 09/26/2015 14:00: | |
| Cholesterol in LDL [Mass/volume] in Serum or Plasma | 116 | milligrams per deciliter | Recommended: <130; Moderate Risk: 130-159; High Risk: >160 | N | F | 09/25/2015 :: | | 09/26/2015 14:00: | |

| Prefix (e.g., DR) | | |

Incorporate Verification

Legend for Store Requirement

S-EX : Store exact

S-TR-R : Translate and store translation (exact value can be re-created from translation any time)

S-EX-A : Store exact by association

S-RC : Process and re-create

S-EQ : Store equivalent

(See "Instructions to Testers for Verification of Store Requirements" at the end of this Juror Document for additional details.)

| Note 1 - The HIT must store the <u>Identifier</u> and the <u>Text</u> for each populated triplet using the S-EX-A, S-TR-R, or S-EX store requirement as indicated. If <u>Original Text</u> field is populated, MUST store the exact data received. | | | | |

Instructions to Testers for Verification of Store Requirements

Note: The HIT Module being tested is always allowed to incorporate/store the exact data received in the LRI message even if a given Store Requirement does not explicitly state that the HIT Module is permitted to do so.

| Store Requirement | Definition | Instructions for Verification of Requirement During Conformance Testing |
|-------------------|---|---|
| S-EX | Store Exact | <p>The HIT Module being tested must be designed to incorporate/store only the exact data received in the LRI message.</p> <ul style="list-style-type: none"> Tester must verify that the HIT Module being tested incorporates/stores in the patient's laboratory result record only the exact data received in the LRI message, and that the HIT Module does not just store an equivalent of that exact data or just a pointer to the exact data. |
| S-EX-A | Store exact by association | <p>The HIT Module being tested must be designed (1) to incorporate/store the exact data received in the LRI message OR (2) to use a pointer to a location (e.g., file/table in or accessible to the HIT Module) where the exact data can be obtained.</p> <ul style="list-style-type: none"> Tester must verify that the HIT Module being tested incorporates/stores in the patient's laboratory result record the exact data received in the LRI message OR that the HIT Module incorporates/stores in the patient's laboratory result record a pointer to the exact data received in the LRI message. <p>Example: Placer Number; the HIT-originated Placer Number received in the LRI message may be incorporated/stored using a pointer rather than being stored redundantly in the patient's lab result record.</p> |
| S-EQ | Store equivalent | <p>The HIT Module being tested must be designed to transform the exact data received in the LRI message to an equivalent format and then incorporate/store the equivalent format.</p> <ul style="list-style-type: none"> Tester must verify that the HIT Module being tested transforms the exact data received in the LRI message to an equivalent format and incorporates/stores the equivalent format in the patient's laboratory result record. |
| S-TR-R | Translate and store translation (exact value can be re-created from translation any time) | <p>The HIT Module being tested must be designed to transform the exact data received in the LRI message to an equivalent value and then incorporate/store the equivalent value.</p> <ul style="list-style-type: none"> Tester must verify that the HIT Module being tested incorporates/stores in the patient's laboratory result record the equivalent value. Tester must also verify that the HIT Module is able to re-create from this equivalent value the exact data received in the LRI message. |
| S-RC | Process and re-create | <p>The HIT Module being tested must be designed to process and incorporate/store in an "abstract-able manner" (e.g., using the HIT Module's data model) the exact data received in the LRI message and to re-create the exact data (e.g., from the HIT Module's data model).</p> <ul style="list-style-type: none"> Tester must verify that the HIT Module being tested processes and abstractly incorporates/stores in the patient's laboratory result record the exact data received in the LRI message. Tester also must verify that the HIT Module is able to re-create the exact data received in the LRI message by abstracting the data (e.g., from the HIT Module's data model). <p>Example: Identifier Type Code; the HIT Module uses a separate file/table to store Social Security Numbers versus internal Medical Record Numbers, and does not need to retain the Identifier Type Code</p> |
