

Description

The LIS system creates and delivers an electronic lab result message to the EHR-S. This test plan is designed to test the systems' capability to process reflex test reports which use the parent/child reporting structure.

PreCondition

Patient information is pre-loaded in the EHR-S.
No other Pre-Condition.

PostCondition

The test message information received by the EHR-S has been incorporated with the patient's record.

TestObjectives

- Demonstrate ability to import and incorporate a reflex result message when the filler order number uniquely identifies the test ordered. (FRU profiles).
