

Description

Dr Radon's EHR-S transmits an accept acknowledgement message to Century Hospital's LIS which indicates the ORU message Prothrombin Time (PT + INR) test results has been successfully received.

Comments

This is the initial "smoke testing" to reveal simple failures of the acknowledgment message severe enough to preclude further testing.

PreCondition

No Pre-Condition.

PostCondition

The ACK_0.0_4.1-NG test message information is incorporated into the LIS system.

TestObjectives

- Minimally populated message.
- Demonstrate ability to import and incorporate all required data elements for the accept acknowledgement test case:
- Minimally populated MSH Segment - Demonstrate the capability to support the minimally required data elements in the MSH segment.
- Minimally populated MSA Segment - Demonstrate the capability to support the minimally required data elements in the MSA segment.

Notes to Testers

To support real-time dynamic testing, the Tester at their discretion, may selectively modify result acknowledgement data prior to importing the test message into the EHR technology.
