

Description

The LIS system creates and delivers an electronic lab result message to the EHR-S. This test plan is designed to test the EHR-S' capability to process the progression from a "final" to "amended" report.

PreCondition

Patient information is pre-loaded in the EHR-S.
No other Pre-Condition.

PostCondition

The test message information received by the EHR-S has been incorporated with the patient's record.

TestObjectives

- Demonstrate ability to import and incorporate a final and amended results message.

Notes to Testers

Use of the amended result status code 'A' is permitted, so this test case constitutes an optional test case, should partners agree to support this concept.
