

#### Description

Mr. Hector Ramos is a 81 year old Hispanic male who is on warfarin therapy. Mr. Ramos presents to Good Health Clinic to see Dr. Radon for a routine check up. The doctor orders a Prothrombin Time (PT + INR) test from the clinical lab at Century Hospital using the clinic's EHR system and instruct Mr. Ramos to go to the laboratory's patient service center to have the blood sample collected. The laboratory performs the requested test and the final result was 10.5 sec with a ref range of 9.5-13.8 sec and the INR calculated to be 1.0 {INR} with a normal reference range being 0.8 and 1.2 {INR}. The final result report for this lab test was generated by the LIS and transmitted to the patient's record in the Good health Clinic's EHR system.

#### Comments

This is the "smoke test" - testing basic functionality and support for all Required elements per the LRI IG to reveal simple failures severe enough to preclude further testing..

#### PreCondition

Patient information is pre-loaded in the EHR-S.  
No other Pre-Condition.

#### PostCondition

The test message information received by the EHR-S has been incorporated with the patient's record.

#### TestObjectives

- Minimally populated message.
- Demonstrate ability to import and incorporate all required data elements for the test case:
- Minimally populated MSH Segment - Demonstrate the capability to support the minimally required data elements in the MSH segment.
- Minimally populated PID Segment - Demonstrate the capability to support the minimally required data elements in the PID segment.
- Minimally populated ORC Segment - Demonstrate the capability to support the minimally required data elements in the ORC segment.
- Minimally populated OBR Segment - Demonstrate the capability to support the minimally required data elements in the OBR segment.
- Minimally populated OBX Segment - Demonstrate the capability to support the minimally required data elements in the OBX segment.

#### Notes to Testers

No Notes.
