

#### Description

Some time after initial Laboratory Test Compendium is delivered electronically from the LIS to the EHR-S, the LIS send up to four eDOS update messages to the EHR-S to update multiple tests. The EHR-S will integrate these updates into its test directory.

#### Comments

Updates to multiple records.

#### PreCondition

Initial load of compendium data elements are incorporated appropriately into the EHR-S.

#### PostCondition

Data elements are incorporated appropriately into the EHR-S.

#### TestObjectives

- Demonstrate capability to support update using multiple actions for several records in an existing test compendium.

#### Notes to Testers

Verification of this test case requires comparison to the data that was available after the initial load.
