

Description

Dr Radon's EHR-S transmits an application acknowledgement message to Century Hospital's LIS which indicates the ORU message Prothrombin Time (PT + INR) test results has been successfully parsed and incorporated.

Comments

This is the initial "smoke testing" to reveal simple failures of the application acknowledgment message severe enough to preclude further testing.

PreCondition

No Pre-Condition.

PostCondition

The ACK_0.0_4.1-NG test message information is incorporated into the LIS system.

TestObjectives

- Minimally populated message.
- Demonstrate ability to import and incorporate all required data elements for the application acknowledgement test case:
- Minimally populated MSH Segment - Demonstrate the capability to support the minimally required data elements in the MSH segment.
- Minimally populated MSA Segment - Demonstrate the capability to support the minimally required data elements in the MSA segment.

Notes to Testers

To support real-time dynamic testing, the Tester at their discretion, may selectively modify result acknowledgement data prior to importing the test message into the EHR technology.
