

#### Description

The initial Laboratory Test Compendium is delivered electronically from the LIS to the EHR-S. The EHR-S will integrate the eDOS into its test directory and use it to allow placement of orders electronically. The initial laboratory test compendium is composed of up to four messages.

#### Comments

This is the initial "smoke testing" to reveal simple failures severe enough to preclude further testing.

#### PreCondition

No Pre-Condition.

#### PostCondition

No Post-Condition.

#### TestObjectives

- Demonstrate capability to support minimally populated messages (single occurrences of all required ("R") elements).
