## DISPLAY VERIFICATION

This Test Case-specific Juror Document provides a checklist for the Tester to use during certification testing for assessing the health information technology (HIT) module's ability to receive and process an Acknowledgement message related to laboratory order messaging in which NO Error is returned in the ACK message.

The exact wording and format of the display in the HIT module is not in-scope for this test.

Process an Acknowledgement
The receiving HIT module being tested shall process the ACK message correctly; a positive notification indicating that the ACK message was processed correctly <u>need not be made visible</u> in the module.
