

Description

Mr. Hector Ramos is a 81 year old Hispanic male who is on warfarin therapy. Mr Ramos presents to Good Health Clinic to see Dr. Radon for a routine check up. The doctor orders a Prothrombin Time (PT + INR) test using the clinic's EHR system and instructs Mr Ramos to go to the laboratory's patient service center to have the blood sample collected.

Comments

This is the "smoke test" - testing basic functionality and support for all Required elements per the LOI IG to reveal simple failures severe enough to preclude further testing.

PreCondition

No Pre Condition.

PostCondition

No Post Condition.

TestObjectives

- Minimally populated message.
- Demonstrate ability to generate a base LOI OML message, populating all the all required data elements for the test case.
- Minimally populated MSH Segment - Demonstrate the capability to support minimally required data elements in the MSH segment.
- Minimally populated PID Segment - Demonstrate the capability to support minimally required data elements in the PID segment.
- Minimally populated ORC Segment - Demonstrate the capability to support minimally required data elements in the ORC segment.
- Minimally populated OBR Segment - Demonstrate the capability to support minimally required data elements in the OBR segment.
- Minimally populated DG1 Segment - Demonstrate the capability to support minimally required data elements in the DG1 segment.
