

Description

Some time after initial Laboratory Test Compendium was updated electronically from the LIS to the EHR-S, the LIS sends up to four additional eDOS update messages to the EHR-S to update multiple tests. The EHR-S will integrate these updates into its test directory.

Comments

Updates to multiple records.

PreCondition

Initial load of compendium data elements and previous updates to it are incorporated appropriately into the EHR-S.

PostCondition

Data elements are incorporated appropriately into the EHR-S.

TestObjectives

- Demonstrate capability to support subsequent updates using multiple actions for several records in an existing test compendium.
