

Description

The LIS system creates and delivers an electronic lab result message to the EHR-S. This test plan is designed to test the systems' capability to process the progression from a "final" to "wrong patient" report.

Comments

The LIS system creates and delivers an electronic lab result message to the EHR-S. This test plan is designed to test the systems' capability to produce a "final" report and be able to indicate, that a report was sent in error on the wrong patient.

PreCondition

No Pre-Condition.

PostCondition

No Post-Condition

TestObjectives

- Demonstrate ability to create final result message and subsequently report that that result was reported on the wrong patient.
