-Description

Mr. Hector Ramos is a 81 year old Hispanic male who is on warfarin therapy. Mr Ramos presents to Good Health Clinic to see Dr. Radon for a routine check up. The doctor orders a Prothrombin Time (PT + INR) test using the clinic's EHR system and instructs Mr Ramos to go to the laboratory's patient service center to have the blood sample collected.

Comments

This is the "smoke test" - testing basic functionality and support for all Required elements per the LOI IG to reveal simple failures severe enough to preclude further testing.

-PreCondition-

No Pre Condition.

PostCondition

No Post Condition.

TestObjectives

- · Minimally populated message.
- · Demonstrate ability to generate a base LOI OML message, populating all the all required data elements for the test case.
- Minimally populated MSH Segment Demonstrate the capability to support minimally required data elements in the MSH segment.
- Minimally populated PID Segment Demonstrate the capability to support minimally required data elements in the PID segment.
- Minimally populated ORC Segment Demonstrate the capability to support minimally required data elements in the ORC segment.
- · Minimally populated OBR Segment Demonstrate the capability to support minimally required data elements in the OBR segment.
- Minimally populated DG1 Segment Demonstrate the capability to support minimally required data elements in the DG1 segment.
