_	Description————————————————————————————————————					
	Century Hospital's LIS transmits an 'Accept Acknowledgement' message to Dr Ernst's EHR-S which indicates the LOI order message has been successfully received.					
	Comments					
	CONTENTIO					
	This is the initial "smoke testing" to reveal simple failures of the acknowledgment message severe enough to preclude further testing.					
	This is the initial shroke testing to reveal simple failures of the acknowledgment message severe enough to preclude further testing.					

-PreCondition-

The OML message has been sent by the EHR-S

## PostCondition-

No Post Condition.

### -TestObjectives-

- Minimally populated message.
- Demonstrate ability to process all required data elements for the accept acknowledgement test case:
- Minimally populated MSH Segment Demonstrate the capability to support the minimally required data elements in the MSH segment.
- Minimally populated MSA Segment Demonstrate the capability to support the minimally required data elements in the MSA segment.

### Notes to Testers

No Notes.

## -Test Case Information-

# NIST-ACK\_0.0\_1.1-GU - OML Commit Accept

Test Case ID ACK\_0.0\_1.1-GU

## **DISPLAY VERIFICATION**

This Test Case-specific Juror Document provides a checklist for the Tester to use during certification testing for assessing the health information technology (HIT) module's ability to receive and process an Acknowledgement message related to laboratory order messaging in which NO Error is returned in the ACK message.

The exact wording and format of the display in the HIT module is not in-scope for this test.

### Process an Acknowledgement

The receiving HIT module being tested shall process the ACK message correctly; a positive notification indicating that the ACK message was processed correctly need not be made visible in the module.
