Description

Dr. Radon's practice EHR-S transmits an accept acknowledgement message to Century Hospital's LIS which indicates the first test compendium message (M08) has been successfully received.

Comments

This is the initial "smoke testing" to reveal simple failures of the acknowledgment message severe enough to preclude further testing.

PreCondition

EDOS_0.0_1.1-M08_New_SmokeTest has been received by the EHR-S.

PostCondition

eDOS acknowledgement message is processed appropriately by the LIS.

TestObjectives

- Demonstrate capability to support a positive acknowledgement Message in response to receiving the M08 message.
- Demonstrate capability to support a single occurrence of all required ("R") elements in the MSH segment.
- Demonstrate capability to support a single occurrence of all required ("R") elements in the MSA segment.
- Demonstrate capability to support a single occurrence of all required ("R") elements in the MFI segment.
