## Description

The LIS system creates and delivers a simple electronic lab result message to the EHR-S. The EHR-S receives and incorporates the messages, and creates and sends an acknowledgement message. The LIS system receives the acknowledgement message.

## Comments

The initial test plan is a "smoke test" to reveal simple failures severe enough to preclude further testing.

## PreCondition

No Pre-Condition.

## PostCondition

No Post-Condition

## TestObjectives

- Demonstrate capability to support minimally populated messages (single occurrences of all required ("R") elements).
